EDUCATION

New York University, Tandon School of Engineering | New York City, NY **Graduation: May 2030**
Bachelor of Science, Computer Science
Honors & Affiliations: NYU HEOP Scholar, Tech@NYU, Society of Women Engineers (SWE), CSE Peer Mentorship
Relevant Coursework: Intro to CS & Problem Solving, Intro to Engineering & Design, Calculus II

WORK EXPERIENCE

HeadStart Fellowship (Tech Vertical) – Fellow **Sep. 2026 – Present | Virtual**
- Selected for a competitive fellowship, committing 4+ hours per week to technical skill-building.
- Analyze computer science principles through weekly lectures on Data Structures, Algorithms, and LeetCode strategies to prepare for technical interviews.
- Participate in 1:1 technical mentorship to build software engineering interview frameworks, guide independent capstone development, and gain more knowledge on professional pathways within the technology industry.

VIP Math Modeling (Discrete Math Track) – Team Member **Sep 2026 – Present | New York City, NY**
- Reverse-engineer winning solution sets for the COMAP MCM/ICM, a global 100-hour team competition using mathematical modeling to solve real-world problems, to identify optimal mathematical modeling strategies.
- Document discrete math formulations, numerical benchmarks, and problem breakdowns in a VIP research notebook to streamline contest execution for a competition.
- Collaborate in weekly meetings with student teammates and faculty advisors to establish objective criteria for selecting problems.

Intro. to Engineering & Design | NYU Tandon – Student & Project Developer **Sept. 2026 – Present | New York City, NY**
- Execute weekly engineering labs in Arduino IDE programming, circuit breadboarding, and CAD modeling to build technical foundations for a semester-long team design project.

Cisco High Externship – Technology & Strategy Extern **July 2025 – July 2025 | New York City, NY**
- Collaborated in a 6-member team selected from <30 students nationwide to evaluate and analyze how Cisco hardware and software solutions could optimize Delta Airlines flight operations.
- Designed accessibility and translation feature concepts to eliminate airport navigation bottlenecks for non-English speakers and disabled travelers.
- Presented strategic recommendations to 6+ Cisco engineers, earning the Leadership Award (1 of 2 externs) for communication and initiative.

LEADERSHIP & COMMUNITY INVOLVEMENT

Leadership Launch @ NYU – Fellow **Sept. 2026 – Present | New York City, NY**
- Selected for an 8-week leadership incubator to build actionable skills in ethical decision-making and cross-functional team management.
- Led 2 community service initiatives, including meal service operations at Xavier Mission Soup Kitchen, to apply team coordination and collaborative problem-solving in fast-paced environments.

Girls Power the World – Project Founder & Outreach Lead **May 2025 – Apr. 2026 | Virtual**
- Directed an 11-member team to deliver 20+ educational content for underrepresented youth.
- Produced a mini YouTube interview series featuring women in tech, expanding career visibility and engagement for prospective engineering students.
- Partnered with academic institutions and industry leaders to host interactive panels promoting gender equity in tech.

Gurung Tamu Society Student Club – Founding Vice President **Nov. 2023 – Aug. 2026 | New York City, NY**
- Mentored first-generation and underprivileged Nepalese youth ages 6–18 through academic workshops and personal guidance to foster long-term educational achievement.
- Organized and hosted 15+ cultural/career events, distributed 100+ meal packages, and managed $4,100 raised through community fundraisers.

SKILLS & INTERESTS

Technical Skills: Python, Arduino IDE, Circuit Prototyping, CAD Design, Git, Data Structures (In Progress), Math Modeling
Languages: English (Fluent), Nepali (Native), Hindi (Fluent), Spanish (Intermediate)
Interests: Architectural & urban sketching, culinary arts, sci-fi & speculative fiction, conspiracy deep-dives, people watching
